Mrs. Solmaz: Hello, my students! We are organizing a project about ‘Saving Our Planet’. I want you to find the important problems in our world. Do you have an idea? Let’s share together.

Pelin: I think, climate change is the biggest problem. We pollute the rivers, seas , and the factories pour their waste into the water. So fish and other living beings all die. Global warming is really dangerous for the farmers and the animals.

Mustafa: Environment pollution is another problem for me. People cut down the trees and damage living beings. Don’t throw your rubbish around. Instead, we should recycle our litter.

Tony: We should use wind and solar energy. Let’s reduce energy use and use renewable and natural energy sources. Learn the greenhouse effect and save our nature.

Nina: I hope, people will not give harm to the animals anymore. Think about the polar bears. Some animals die because they can’t find food and place to live. Hunting and destruction of forests cause this problem.

Mrs. Solmaz: You are all right, my kids. I agree with you all. I believe, the world is in our hands and we should protect our environment and prevent the pollution.

Mrs. Solmaz and her students prepare an environment campaign at school. There are five people with five different ideas. Please match the names with the pictures.
